CW-3 Crane Barge

MCA UK Loadline Exemption Certificate

A flat top, welded steel pontoon barge with multiple internal sub divided compartments.

Built with forward scows and an aft vertical end plate, this barge has previously been in service for a number of years as the flotation chamber for a harbour roll on roll off facility. Some fittings relating to this service remain in place, i.e 3 of the 4 spud rings on what is now the designated forward end, plus 2 spudleg sockets mounted on the port side.

In addition, a recess of approximately 6m x 1.5m x 6m has been created in the forward end amidships which is perfect for drilling, blasting, pilling and diving operations.

Dimensions: 34m x 18m x 2.7m

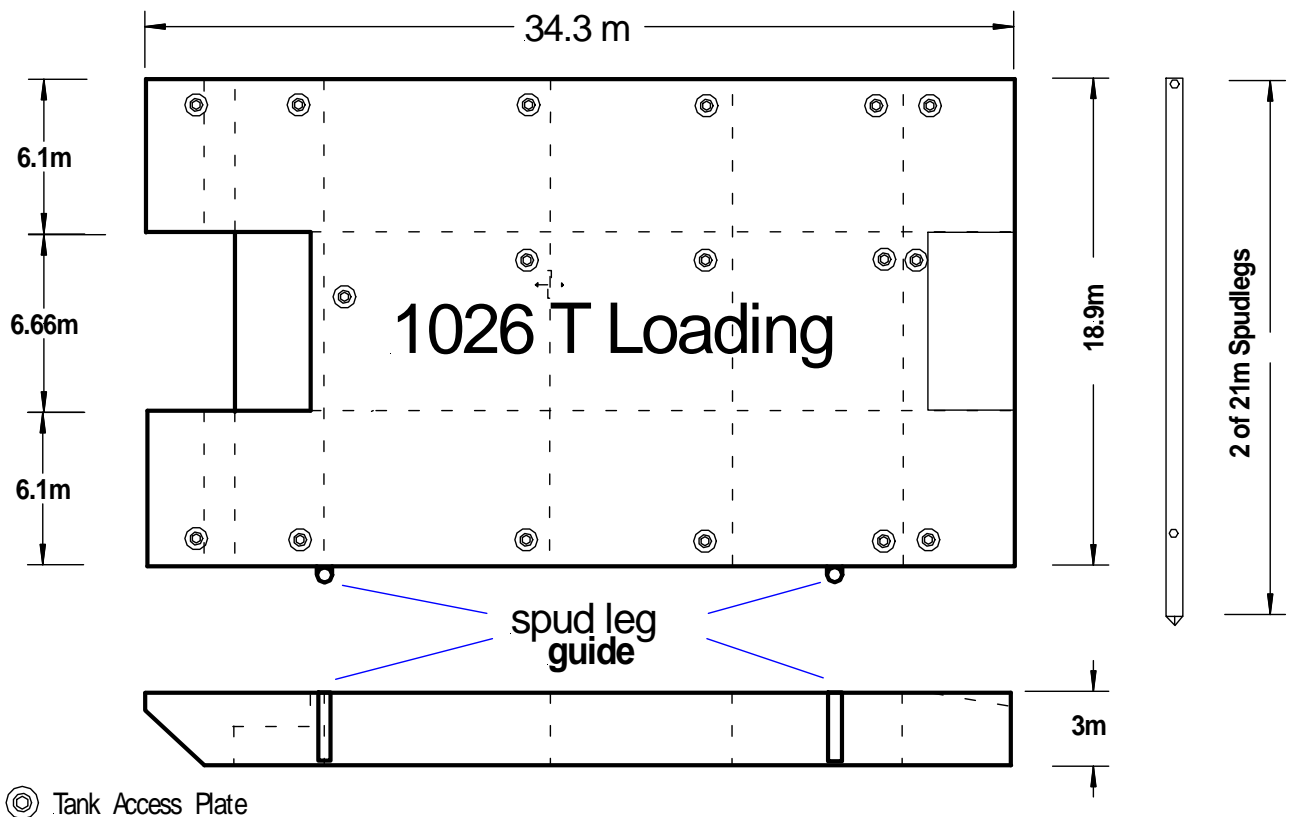

Spudlegs: 18m x 600mm x 10T, 30mm thick

Deck Loading: 1,026T, 7Tm²

Maximum Crane: 180T crawler crane

Sub Division: 17 watertight compartments with flush hatches
